Patterns in Software Engineering

Research Topics
Spring 2011 (2-89-90)

1. Verification/Validation Patterns for Agile Software Development: Survey and Analysis
2. Human-Computer Interaction (HCI) Patterns: Survey and Analysis
3. Model Transformation Patterns in Model Driven Development: Survey and Analysis
4. Patterns of Patterns: Survey and Analysis
5. Pattern-Oriented Analysis and Design: Analysis of the Approaches Currently in Practice
6. Patterns for Distributed Systems: Survey and Analysis of Recent Developments
7. Model Checking Patterns: Survey and Analysis
8. Pattern Mining: Survey and Analysis
9. Patterns for Product/Process Line Engineering: Survey and Analysis
10. Process Patterns for Agent-Oriented Software Development: Survey and Analysis
