Reading Assignment 2

(Point Processes)

Second part of the course is about Point Processes. First you see some applications of point processes and then you should read about the theory of point processes. The main reference for second part is [1]. My suggestion for reading this book is to not get stock on the proofs. Note that if there is no time for one presentation in a week, it will be postponed to the next week and the order of presentations remains the same. Also every body should do general assignments.

First week
1. **General assignment:** reading [2]
2. **Group 1 presentation:** presenting [2]

Second week
1. **Group 2 presentation:** presenting [3]
2. **Group 3 presentation:** presenting [4]

Third week
1. **General assignment:** read chapters 1, 2, 3.1 and 3.2 from [1].
2. **Group 4 presentation:** sections 5.1, 5.2 and 5.3 from [1]. (and 3.1 and 3.2 if needed)
3. **Group 5 presentation:** sections 6.1 and 6.2 from [1]. (and 3.1 and 3.2 if needed)
