Reading Assignment 3
(Point Processes)

Third part of the course is about Point Processes. First you see some applications of point processes and then you should read about the theory of point processes. The main reference for this topic is [1]. My suggestion is not to spent much time on the proofs. In addition, everybody should do the general assignments.

General Assignments

1) Reading [2]

2) Reading chapters 1, 2, 3.1 and 3.2 from [1].

Group Presentation

1) Group 1: presenting [2]

2) Group 2: presenting [3]
